The Sports Radar That Gives You **MORE**

stalker sport

MORE DEVICES

Connect up to 10 iOS devices to one Pro 3s simultaneously via the Stalker Sport App

MORE RANGE

Longer-range wireless connectivity
(at least 120' / 36.5 m)

MORE REFINED

Enhanced Spin Rate capture

Everything You Could Possibly Want In A Handheld Sports Radar Gun

Professional and college athletes, coaches, scouts, and serious parents have relied on Stalker Sport radar technology for decades.

Our Pro S series radars are the **only** handheld radar guns that capture spin rate. And because they also measure peak velocity, rolldown, and exit velocity, they give you every velocity measurement you need to track to improve your game.

The Pro 3s has an enhanced spin rate algorithm, allowing it to measure spin rate faster, with greater accuracy, and at farther distances.

You can also now connect up to 10 iOS devices to one radar gun at the same time, allowing more players, coaches, scouts, and parents to get in on the action.

Spin Rate

The Stalker Pro Series sports radars are the only handheld radar units that capture spin rate.

Exit Velocity

Select Exit Velocity instead of Spin Rate to measure hit speeds.

Rolldown

Measure over-the-plate velocity to observe how your velocity changes as the ball travels.

Peak Velocity

The most accurate handheld Velocity measurements available in the sports world.

Multiple Connections

Up to 10 coaches, players, scouts, and parents can connect their iOS devices to the same Pro 3s radar via the Stalker Sport App.

Better Wireless Range

Once connected, each device can be up to 120' (36.5 m) from the radar, allowing connections from across the stadium.

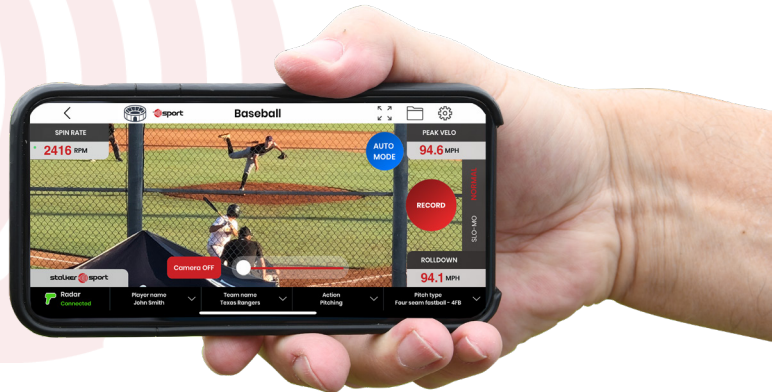

Increased Accuracy

Enhanced algorithms allow increased spin rate accuracy, meaning you no longer have to be directly in line with the ball for accurate readings.

Stalker Sport Radar App

View and Store Data

Create a profile for each player, select the Action being performed (pitching, hitting, or fielding), then record the data streamed from your Pro 3s. You can even designate pitch types. Turn your device into a mobile high-visibility speed sign using Stadium Mode, so players across the field can see their stats.

Capture and Share Video Clips

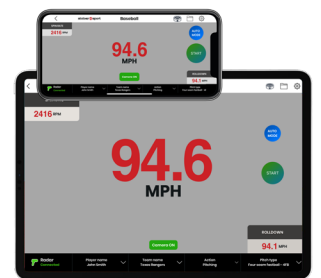

Record regular speed or slow motion video clips in a variety of resolutions. Edit your clips, then share them with coaches, parents, and scouts, complete with your team logo and embedded metadata. Use Auto Mode to automatically record each and every play.

Connect Multiple Devices to One Radar

Up to 10 devices can use the app to pair to one Pro 3 radar gun simultaneously, allowing multiple coaches, scouts, or parents to keep an eye on the game.

Live Stream to Facebook and YouTube.

Add Sideline HD integration to your app to broadcast your app to Facebook and YouTube with ESPN-style overlays of the scoreboard, custom player cards, game location, weather, and, of course, your pitch speed, exit velocity, and spin rate.

Stalker.Sport

Features & Specifications:

- Spin rate capture up to 150 feet
- Velocity capture at 500 feet
- 1-150 MPH speed range
- Removable, rechargeable high capacity lithium-ion battery handle
- Constant transmit time of over 5 hours per charge
- Measures MPH and km/h
- 3 active windows; Peak, Rolldown (across the plate), and Spin Rate (or Exit Velocity)
- Recall previous 10 pitches
- Waterproof to 1 meter of water for up to 30 minutes (IP67)
- Backlit LCD display and keypad

Measure **Velocity**

- Baseball
- Softball
- Tennis
- Pickleball
- Football
- Volleyball
- Soccer
- Cricket
- Snowmobiles
- Archery
- Shooting Sports
- Track and Field
- Car and Horse Racing
- And more!

Measure **Spin Rate**

- Baseball
- Softball

Complete LED Speed Sign Systems
